# DECOR GLASS SERIES

## SLIMLINE DESIGN. ULTIMATE CONTROL.

Architectural slimline design meets light filtering glass technology. The Decor Series utilizes Aura's carbon fiber braid element technology and takes visible light reduction a step further, with a light filtering ceramic glass panel. Transparent to Infrared heat, the glass allows passage of Infrared rays while further reducing visible light output. This heater brings performance while blending into architecturally focused spaces.

# KEY FEATURES

- Ceramic Glass panel front
- IP65 water protection for outdoor use
- Instant, directional heat

- Bluetooth App and Remote Control
- 8000 hour element life
- 304 stainless steel glass trim

# HEATER CONFIGURATIONS
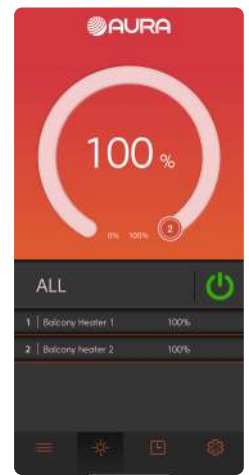

**ADGLASS15120***
1500W | 120V

**ADGLASS30240***
3000W | 240V
2250W | 208V

*Indicates heater color.
B = Black.  W = White.

Pictures above show in 3000W heaters with element on.
